

Kumano Kodo Walk

4 nights/5 days post Japan tour extension April 20–24, 2023.

For over 1000 years, people from all levels of society, including retired emperors and aristocrats, have made the arduous pilgrimage to Kumano. These pilgrims used a network of routes across the Kii Mountains. These trails are now called the Kumano Kodo and accorded UNESCO Heritage status since 2004.

The walk itself was an integral part of the pilgrimage process as they undertook rigorous religious rites of worship and purification. Walking the ancient Kumano Kodo today is a fantastic way to experience the unique cultural landscape of Kumano's spiritual countryside.
